Line System L 640

DESIGNER Elisa Ossino

MADE IN ITALY

Line is a modular system of modular bookcases that introduces a new compositional rhythm into both office and home spaces. This Line Systemar, versatile architecture combines metal, wood and fabric to create various configurations, mixing form and function. The distinct graphic presence of the thermoformed textile panels lends an original look and a warm touch.

MATERIALS

› Frame: metal
› Back panel: thermoformed or metal
› Shelves: metal or lacquered melamine or natural oak melamine

FINISH

› Metal frame, back panel and shelves available in standard colors:V1 Pure White, V38 Signal black, V50 Ochre brown
› Thermoformed backrest: T87 yellow, T89 gray, T84 brown
› Shelves in lacquered melamine ML1 White, ML2 Black, ML3 Ochre brown; natural oak melamine MWL1
› Standard semi-gloss colors
› Customizable colors on request upon availability and at extra charge

ACCESSORIES

› Open lacquered container
› Lacquered drawer container
› Lacquered container with folding door

PRODUCTION

› Dieffebi S.p.a.
› Production start: year 2024
› Place of production: Italy

END OF USE	› At the end of the product's life cycle, we recommend—wherever possible—separating the various components by material to facilitate raw material recovery and recycling processes. If separation is not feasible, do not dispose of the product in the environment; please contact your nearest waste collection or disposal center.
GUARANTEE	› Dieffebi S.p.A. ensures that the product is manufactured using high-quality materials and advanced technologies. The company shall not be held liable for any damage to persons or property resulting from improper use or use not in compliance with the provided instructions.

INSTRUCTIONS FOR USE

› Please read the instructions carefully before using the product. Keep them in a safe piace far future reference.

› The product must be used exclusively for its intended purpose as a storage unit and in accordance with standard duty of care. Improper use-such as using it as a ladder or applying excessive and unbalanced loads-may lead to a risk of accidents.

› **Precautions**
To ensure long-term safety, periodically check that all fasteners and connection elements are properly tightened.

CARE AND MAINTENANCE

› **Powder-coated metal surfaces**
Clean with specific household surface detergents diluted in lukewarm water, provided they are non-abrasive and free of acids or bleach. Avoid abrasive sponges, synthetic fiber pads, or steel wool, which could irreparably scratch the surface. After cleaning, rinse thoroughly to remove any detergent residue that could dull or oxidize the finish. Dry with a chamois cloth. The use of polishing products (polish) for chrome or paint is not recommended: they should only be used by experts, as their abrasive action can damage the surface. In case of doubt, always test the product on a concealed area and wait 24 hours.

› **Fabric Surfaces**
To preserve the appearance and durability of textile upholstery, regular cleaning is essential. Accumulated dust and dirt can deteriorate the fibers; we therefore recommend weekly vacuuming at a low suction setting. Non-greasy stains can be treated by gently dabbing with a clean, lint-free cloth or a well-wrung sponge dipped in warm water. If necessary, use a soap solution or water mixed with liquid dish soap (see formulas). Subsequently, rinse the area with clean lukewarm water. For greasy stains, dry spot removers may be used, strictly following the manufacturer's instructions. In case of doubt, always test the product on a concealed area and wait at least 24 hours to check for any alterations.
Formulas:
• Soap solution: 0.25 di (25ml) of soap flakes per liter of hot water; allow to cool before use.
• Dish soap solution: maximum 1 teaspoon of detergent per liter of water.
• Concentrated detergents: add only a few drops per liter.

› **Wood Surfaces**
Dust and common household stains can be removed with a solution of water and well-diluted neutral soap. It is essential to avoid the use of commerciai stain removers. To avoid scratching the surface, use a soft cloth and clean with circular motions. Do not use solvents or abrasive products. Always dry with a clean, dry cloth. In case of doubt, test the product on a non-visible area and wait 24 hours.
